Subject: FW: Due Today - Please Consider for Cecil's Meeting

Tom,
Jim prepared the below today. I am still reading through it but wanted to get it to you.
Lori

The second request is for the “hottest issues” that Cecil should be aware of when he meets with the region’s state secretaries at an ECOS meeting next week. Just two lines are necessary for each issue – not a full hot issue paper. The deadline for this request is **tomorrow COB**.

Among the potential topics to consider are:

- PFOS/PFOA (Karrie)

Subject: Due Today - Please Consider for Cecil's Meeting

Rick and Lori,

Please share as appropriate with Cecil for his meeting with the State Secretaries.

not responsive based on revised scope

PFAS Sites

DuPont/Chemours, Washington Works, WV

GenX has been used in the manufacture of Teflon since 2009 at the Washington Works facility when it replaced PFOA. GenX is manufactured at the Chemours Fayetteville, NC facility where the compound had been identified in the Cape Fear River. Chemours is working with State and EPA Region 4 to address the issue.
